### **DETAILED ACTION**

#### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: A method for authenticating an item by means of tagging an item and detecting the distribution of taggants optically by which authenticating data points by generating data according to taggant coordinate distribution is not found taught nor suggested in the prior art. Specifically, determining and generating data coordinates which requires a two-point coordination system is novel and non-obvious.
2. The closest prior art of record uses an only a single dimension for the detection of taggants in an item such as a card. As seen in the prior art to Hoshino, this reference uses a single dimension and does not use coordinates, a two dimension detection point, to determine the location and verification of taggants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
